

Mining Assistant Manual

by Blackeye

The purpose of the Mining Assistant is to gather in a fast and reliable way, all data needed to create and evaluate the rentability of the Mining Routes

The Programm got 3 Hotkeys that I recommend to set up in order to get a smooth gaming Loop. The 3 Hotkeys let you control the Mining assistant in Remote and open Overlays to input the Data, so there is no need to Tab out of the Game

1. Username
2. Start/End Spaceport
3. Mining Location
4. Ship/vehicle/Tool used
5. Crew involved
6. profit
7. Time needed
8. GPM
9. Income
10. Cost
11. Date

In the Following pages I will try to explain all the function I have implemented

The Start Page has a few buttons and selects to set up the data for your flight.

It also shows the Stats relative to your version and ship selected.

As first you see the All time highest flight in term of Gpm and your average and the flown Routes

then you have the Last 5 Routes and a Graph showing the GPM variation in % of the last max 20 Routes

1. Start/Pause Timer
2. Finish Route
3. Manual Route
4. Export Import
5. Select Flight Data
6. Statistic
7. Config

1. Start/Pause and Reset Button

Simple Button to Start, Pause or Resume the Timer. Also the Reset Timer Button should be clear

2. Finish Route

Finish Route opens a Window where are asked the Income from all the Goods and the Cost from the flight (fuel/repair)

3. Manual Route

a simple method to enter a route in manual way for when you forgot to track the route

4. Import/Export

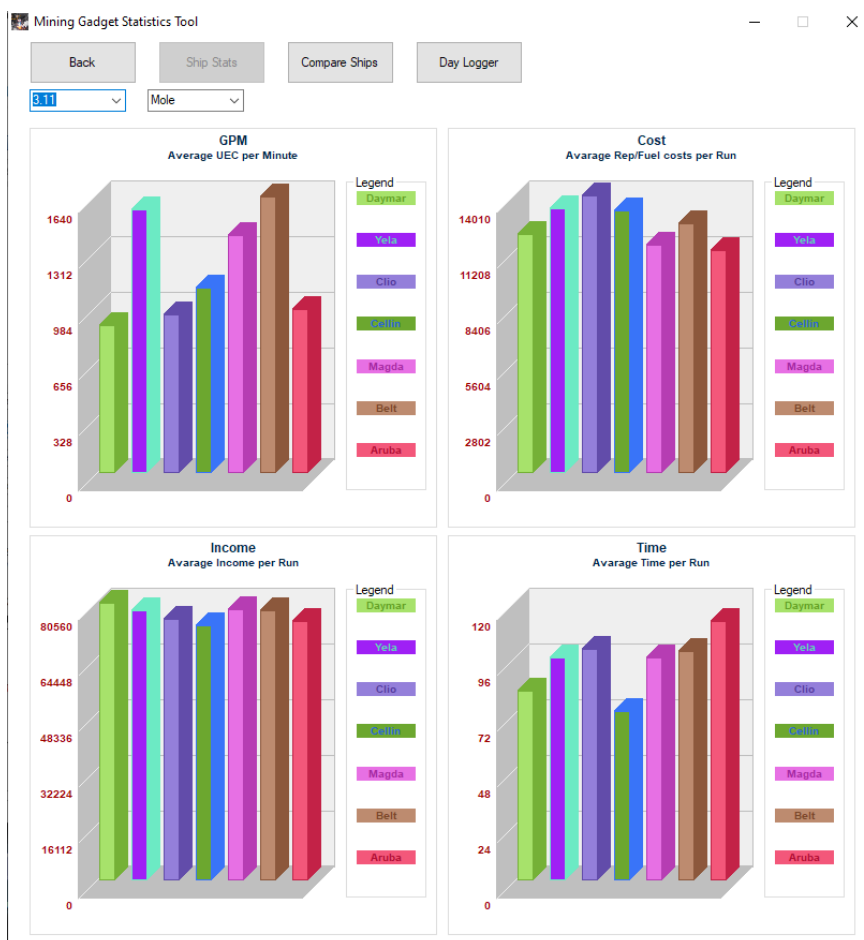

an easy way too share your saved Routes. In the Import it also compares the data in the Import File and your saved Routes and imports only the Routes missing and don't creates duplicates. So feel free too Share your Data with all your Friends.

5. Select Flight Data

I Think its clear whats meant with this Point and dont neats further explanation

6. Statistics

As shown in the Image belwo it lets compare you the data gathered from your Routes, im trying to add more Statistic sheets later. Or you Export your Data and import it in excel and create your own

7. Config

The Programm got 3 Hotkeys that I recommend to set up in order too get the a smoth gaming Loop. The 3 Hotkeys let you controll the Mining assistant in Remote and open Overlays to input the Data, so there is no need to Tab out of the Game

You can also activate an overlay that indicate the State of the Timer.

I has to Styles one time a small Square or a bit larger with the Time also Shown
